

M DEVA PRASANNA PRINCE

devaprasannaprincem@gmail.com — +91 93602 49502 — LinkedIn — GitHub — Portfolio

Professional Summary

AI/ML engineer specializing in offline-first platforms, learning gap detection, and scalable AI systems. Proficient in Python, JavaScript, and full-stack development with hands-on experience in machine learning, data analytics, and end-to-end AI projects. Strong background in building production-ready systems with focus on responsible AI and user-centric design.

Education

B.Tech Artificial Intelligence and Data Science

Karunya Institute of Technology and Sciences, Coimbatore

Aug 2023 – May 2027

CGPA: 6.93/10

Skills

Languages: Java, Python, C, JavaScript

Frameworks: React, FastAPI, Node.js, Express, Tailwind, Bootstrap

Databases: MySQL, MongoDB, PostgreSQL, SQLite

ML/Data: Pandas, NumPy, Scikit-Learn, TensorFlow, OpenCV

Tools: Git, GitHub, VS Code, Power BI, Vercel

AI/ML: LLMs, RAG, XGBoost, ONNX, SHAP

Soft Skills: Problem Solving, Critical Thinking, Team Collaboration, Communication

Work Experience

Data Analyst Intern — Grantley EduTech (Bengaluru)

Oct 2024 – Jan 2025

- Analyzed 20K+ rows using Pandas/NumPy; informed 3 product decisions
- Reduced preprocessing pipeline time by 35% via automation; built Power BI dashboards for weekly reporting

Web Developer Intern — Technohacks Solutions (Nashik)

Jun 2024

- Developed 10+ responsive UI components (JS/HTML5/CSS3), reducing dev time by 25%
- Resolved 15+ cross-browser bugs; maintained 100% lint-passing code with clean practices

Projects

Athena AI — Offline EdTech Intelligence Platform

Phi-3-mini, XGBoost, ONNX, SHAP

- Offline-first multi-agent AI for learning gap detection in rural classrooms on 4GB-RAM Android devices
- Contradiction Detection engine: 80% misclassification reduction across Tamil/Hindi/Marathi
- Early Warning Agent (AUC 0.82) for dropout-risk prediction; Teacher Copilot in 40+ languages

Generative AI for Simplifying Legal Documents

LLMs, RAG, FastAPI, React

- Developed Generative AI solution that converts complex legal documents into plain language for accessibility
- Automatically highlights critical clauses and extracts key terms; improves document comprehension for non-legal users
- Built RAG pipeline for context-aware explanations; deployed full-stack application with FastAPI backend and React frontend

AI Resume Analysis System

Python, NLP, ATS Scoring, LLMs

- AI-powered resume screening platform with ATS compatibility scoring and skill-gap identification across 50+ job roles
- Extracts resume keywords using NLP; compares against role-specific requirements to surface missing competencies
- Generated personalized improvement recommendations translating raw NLP output into actionable, human-readable feedback

Face Recognition System

Python, OpenCV, TensorFlow

- Real-time pipeline: 92% accuracy on 500 labeled faces, 24fps live video, <100ms latency
- Emotion/gender detection with automated CSV attendance logging and email notifications

Achievements

- Finalist — SahAI for Shiksha Hackathon 2026 (Wadhwani AI) — Athena AI project submitted
- Active LeetCode practitioner (Arrays, Trees, DP, Graphs) — targeting strong problem-solving foundation
- Built production-ready AI/ML projects deployed on Vercel with live user engagement

Certifications

Cisco Certified — Programming in C and Python • Infosys Certified — Java Programming
Languages: English (Professional) • Tamil (Native) • Japanese (Intermediate)
